DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to the method of stopping and/or extinguishing fire, classified in class 169, subclass 46.
- II. Claims 9-15, drawn to the apparatus of stopping and/or extinguishing fire by erecting a wall comprising fire-resistant material, classified in class 169, subclass 67.

The inventions are distinct, each from the other because of the following reasons:

Inventions as claimed in Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Group I is drawn to the method of stopping and/or extinguishing fire, and Group II is drawn to the apparatus of stopping and/or extinguishing fire by erecting a wall comprising fire-resistant material.
